1. Task 1: Body Mass Index (BMI) Calculator

Code:

```
 a = "yes"
b = "yes"
while b == a:
    weight = float(input())
    height = float(input())
    bmi = weight / (height * height)
    if bmi < 18.5:
        catagory = "underweight"
    elif 18.5 <= bmi <= 24.9:
        catagory = "normal weight"
    elif 25.0 <= bmi <= 29.9:
        catagory = "overweight"
    else:
        catagory = "obezz"
    print("BMI =", bmi)
    print("catagory:", catagory)
    a = input("Do you want ti try againn?? (yes/no): ")
    if a!=b:
        print("program is endded")
        break
```

Output / Screenshots:

```
============ RESTART: /Users/macbook/Documents/task(1)with bonus.py ============

1.89
BMI = 27.434842249657066
catagory: overweight
Do you want ti try againn?? (yes/no): No
program is endded
```

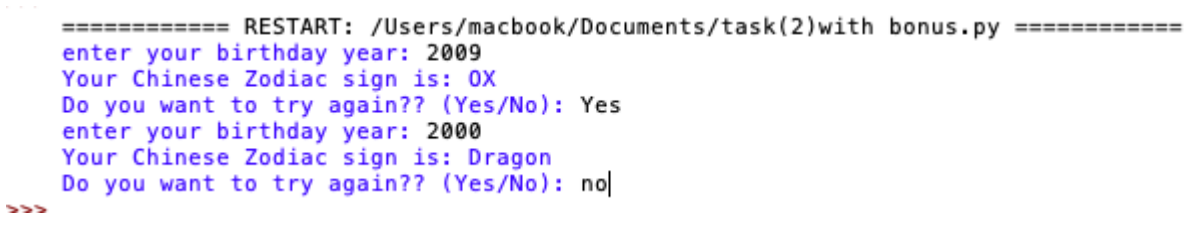

---

2. Task 2: Chinese Zodiac Calculator

Code:

```
a = "Yes"
b = "Yes"
while a == b:
    year = int(input("enter your birthday year: "))
    remainder = year % 12
    if remainder == 0:
        zodiac = "MONKEY"
    elif remainder == 1:
        zodiac = "ROSTER"
    elif remainder == 2:
        zodiac = "dog"
    elif remainder == 3:
        zodiac = "pig"
    elif remainder == 4:
        zodiac = "Rat"
    elif remainder == 5:
        zodiac = "OX"
    elif remainder == 6:
        zodiac = "Tiger"
    elif remainder == 7:
        zodiac = "rabbit"
    elif remainder == 8:
        zodiac = "Dragon"
    elif remainder == 9:
        zodiac = "Snake"
    elif remainder == 10:
        zodiac = "horse"
    elif remainder == 11:
        zodiac = "sheep"
    print("Your Chinese Zodiac sign is:", zodiac)
    a = input("Do you want to try again?? (Yes/No): ")
    if a=="No":
        print("Program endded")
        break
```

Output / Screenshots:

---

3. Task 3: Birthday Guessing Game

Code:

```
a = "Yes"
b = "Yes"

while a == b:
    day = 0

    # Set 1
    print("\nSet 1:")
    print(" 1  3  5  7")
    print(" 9 11 13 15")
    print("17 19 21 23")
    print("25 27 29 31")
    ans1 = int(input("Is your birthday in Set1? (1 for Yes, 0 for No): "))
    if ans1 == 1:
        day += 1

    # Set 2
    print("\nSet 2:")
    print(" 2  3  6  7")
    print("10 11 14 15")
    print("18 19 22 23")
    print("26 27 30 31")
    ans2 = int(input("Is your birthday in Set2? (1 for Yes, 0 for No): "))
    if ans2 == 1:
        day += 2

    # Set 3
    print("\nSet 3:")
    print(" 4  5  6  7")
    print("12 13 14 15")
    print("20 21 22 23")
    print("28 29 30 31")
    ans3 = int(input("Is your birthday in Set3? (1 for Yes, 0 for No): "))
    if ans3 == 1:
        day += 4

    # Set 4
    print("\nSet 4:")
    print(" 8  9 10 11")
    print("12 13 14 15")
    print("24 25 26 27")
    print("28 29 30 31")
    ans4 = int(input("Is your birthday in Set4? (1 for Yes, 0 for No): "))
    if ans4 == 1:
        day += 8
```

```
# Set 5
print("\nSet 5:")
print("16 17 18 19")
print("20 21 22 23")
print("24 25 26 27")
print("28 29 30 31")
ans5 = int(input("Is your birthday in Set5? (1 for Yes, 0 for No): "))
if ans5 == 1:
    day += 16

print("\nYour birthday is:", day)
a = input("\nDo you want to try again?? (Yes/No): ")
```

Output / Screenshots:

```
